

Knowledge Organiser: Computing
Creating media – Photo editing

In Year 3, you learnt:

- how to use a range of techniques to create a stop-frame animation using tablets
- to use these skills to create a story-based animation
- to add other types of media to your animation, such as music and text.

Key Vocabulary			
image	save	adjustments	vignette
edit	search	effects	retouch
arrange	copyright	colours	clone
select	composition	hue/saturation	recolour
digital	pixels	sepia	magic wand
crop	rotate	version	sharpen
undo	flip	illustrator	brighten
fake	real	composite	cut
copy	paste	alter	background
foreground	publication	elements	original

Key Facts

- digital images can be changed
- images can be changed for different uses
- not all images are real
- an online image editor is a program that allows a user to make changes to an image and then save the image as a new version
- pixels are the small dots of colour that make up an image, and that the more pixels in an image, the larger the image, and the more detail it can store.
