| Children will now progress from unihoc to hockey. They will learn the different types of pass and dribble in hockey as well as receiving the ball using a cushion. They will take part in mini games. To ensure safety, all children will wear correct PE kit, have hair tied back and earrings removed or covered. Children in LKS2 will use correct hockey sticks and balls during drills. Children are allowed to wear shin pads if they wish. During mini games, a tennis ball or softer equivalent will be used. | Children will be taught how to hold the stick correctly, push the ball correctly and receive the ball using the 'cushion'. They will develop their skills using open stick dribbling, Indian dribbling and hitting the ball with some accuracy. Mini games will be played whilst becoming familiar with the basic rules of hockey. |
